Chair of CCPR

CCPR's 38th National Conference

Fair play and sport - fact or fantasy?

CCPR
One voice for sport and recreation

Come and debate some of the biggest issues in sport and recreation with some of the sharpest minds in the sector.

From cheating and doping, to race and sexuality, fair play touches on every sport and activity, at every level. But, in light of a litter of scandals in elite sport last year, are we in danger of losing touch with what fair play means and how it impacts on participants from the grassroots up? And what does fair play mean when it comes to bidding for major events or the allocation of funding for sporting participation?

CCPR's 38th National Conference will tackle head-on the big issues with keynote speeches and discussions. But this year we will also offer delegates the chance to get into the nitty gritty in a range of practical workshops on topics such as vetting and barring, the Equalities Bill and Europe. With great networking in luxurious surroundings, CCPR's National Conference is the one event in the sports calendar which brings together governing bodies, politicians, journalists, academics and sports business people.
